INTRODUCTION

Much time and effort has gone into abstracting and compiling the material contained in this book to insure as much accuracy as possible. The original marriage licenses were used to obtain the information and many were hard to read due to the different handwriting of the original writers or due to the effects of time or combinations of both. Therefore, there may be mistakes but every effort has been made to minimize them.

In using this book you will find the names in alphabetical order with the surnames of the grooms in all uppercase letters and the brides surnames are in upper and lower case. For example, GROOM, I. M. 18 Jun. 1860 Bride, U.R.

You will notice that after some of the dates I have made some notes. These notes are to aid in your research if you would like to obtain a copy of the original marriage license or a record of the marriage. The following is a list of these notes and their meaning:

License No Record, there is an original license but it is not listed in the record book at the Courthouse.

Record Only, there is a listing of the marriage in the record book in the Courthouse but no original license.

Application Only, there is a copy of the original application on file but it is not listed in the record book at the Courthouse.

Record of App. Only, there is a listing of the marriage application in the record book in the Courthouse but no original application on file.

This book was created to assist in the genealogical efforts of our fellow researchers. The Suwannee Valley Genealogical Society, Inc. reserves all rights and no portion of this book may be reproduced mechanically, electronically or by any other means, including photocopying without written permission of the Society.

I would like to thank Cynthia A. Penney for her assistance in the development of this book.

This book is available for purchase through the Society for your own use.
